

SakkemotoCoin (\$SAKKE) — Whitepaper

Community-Driven Solana Token | Fair Launch | Ecosystem Vision 2025–2027

1. Abstract

SakkemotoCoin (\$SAKKE) is a transparent, community-first Solana token launched fairly via Pump.fun. The project originates from 5+ years of open financial-freedom education, evolving into a long-term, anti-rug ecosystem initiative.

2. Core Principles

- Fair launch — no pre-allocation for team tokens
- Liquidity flow: Pump.fun → Raydium
- Transparency and community ownership
- Long-term infrastructure focus over short-term speculation
- Anti-rug mechanisms and public verification

3. Token Overview

Ticker: \$SAKKE

Chain: Solana

Launch: Pump.fun Fair Launch

Contract: To be published at launch — always verify official channels

4. Tokenomics (Template)

Complete tokenomics will be finalised and posted prior to listings and major campaigns. Required fields include total supply, liquidity %, community rewards %, allocation rules, and vesting if applicable.

5. Roadmap 2025–2027

2025 — Fair Launch: Community setup, contract verification, governance channels, education.push

2026 — Builders Reveal: Contributor reveal, pilots, tooling, reward systems, infra spec reveal

2027 — New Frontier: Community-owned stack, education products, possible chain elements, ecosystem scale

6. Ecosystem Vision

Beyond the token, Sakkemoto aims for an ecosystem covering education, community tooling, financial autonomy resources, and decentralised ownership milestones through 2027.

7. Risks & Disclaimer

Crypto assets are volatile. The fair launch model reduces central control but not market risk. This is not financial advice. Validate all contracts and announcements via official community and site channels.
